

Cold Lamination Film 75μm

This Self Adhesive Cold Lamination Film is a cost effective 75 micron monomeric film with a permanent acrylic base adhesive. It is suitable for flat surfaces-glass, metal, painted and lacquered rigid plastic surfaces. Suitable for promotional vehicle fleets, signage, window displays, public transport and exhibition panels. Available in gloss white and matt white.

Vinyl type:	Calendered monomeric, clear, gloss/matt
Vinyl width:	1.07/1.37/1.52m
Vinyl thickness:	75μm
Coating:	No Coating
Adhesive:	Permanent, clear acrylic base. No reaction between solvent ink and adhesive
Liner weight:	88g/m ² , PE coated silicon paper
Application temperature:	Minimum 10C&dedeg;
Temperature resistance:	-20C° to 65C°
Storage:	21C°
Durability:	6-12 months under vertical indoor exposure

Characteristics		Values
PVC Film	Type	Calendered monomeric, transparent
	Thickness	65 micron
	Finish	Glossy, Matte
Adhesive	Type	Permanent, clear acrylic base
	Thickness	15 micron
	Initial Adhesion	≥5 N/25mm
	Adhesion 24h	≥8 N/25mm 180° peel
	180° peel strength	13~15 N/25mm (after 20 minutes, on stainless steel)
Release Paper	Type	One side PE coated silicon paper
	Weight	90 g/m ²
Regular Size		36"/42"/50"/54"/60" * 50M
